On-Farm Grain Storage Guide

BRINGING THE PORT TO THE PRODUCT

Introduction

The recent completion of the new partially grower owned T-Ports supply chain to the Eyre Peninsula gives growers the opportunity to take control of their product, create their own supply chain efficiencies and maximise returns to the farm gate. There has never been a better time to look at investing in on-farm storage. New competition in the grains industry, grower ownership in T-Ports, more competitive freight rates, post-harvest delivery fee discounts, grain market volatility and federal government tax incentives provide a great climate to review your business plans and investment strategies.

T-Ports has put together this on-farm storage guide to assist growers in making decision on the types of grain storage that best suits their business model with a supplier list to obtain further information.

5 x 136t, with aeration/fumigation, sealed to AS:2628. Including delivery, approx. \$132,000 (including concrete) for 650t of storage.
Supplier: Ahrens Engineering, EP example 2020

206t, \$45,000 + concrete each. 90ft auger/tubulator to fill
Supplier: SA Grain Services

737t, \$131,000 incl concrete
1331t, \$156,000 each incl concrete, supplier: AGCO - GSI Silos Tim Pfeiffer

Kotzur GP 18-10 flat bottom, sealed, 1518t, need 90ft auger

Internal reclaim sweep auger

\$130,000 each includes concrete

2x500t, \$260,000 for pair
2x750t, \$330,000 for pair
2x1300t, \$455,000 for pair

Prices include concrete

Sukup silos – Gavin Wilson

Kotzur GPE 10-6-35, 286t, need 68ft auger

\$70,000 each includes concrete

Kotzur SA Agent: Brian Barnett - Nutrien Ag Kadina

\$25,000 for bag filler, \$40,000 for bag un-loader, 75m or 220t bag, \$840
 1 x 220t bag costs approx. \$10/t to fill and empty.
 Supplier: EP Ag n'Fert Kimba

[60m x 25m x 10m] and [25m x 50m x 10m] sheds. [Wudinna]
 \$420,000 [for both] includes tank, pad and concrete [EP circa 2015]
 Supplier: Impact Sheds

Vennings
121t
\$122,000

Dunstan
150t - \$164,000
110t - \$134,000

Vennings
33t
\$85,500

110t to 150t mother/chassis bin.
Approx. \$122,000 to \$164,000 depending on options [hydraulics, scales, lids, steering, Auger capacity TPH]
Suppliers: Lienert Eng Kimba, Vennings Kadina, Dunstan Farmers

Redden Bros sheds
48.5m x 28m x 7.5m [Waddikee]
\$425,000 includes tank, pad, concrete [EP example 2019]

Redden Bros sheds
64m x 30m x 7.5m, full concrete floor and storage walls
\$655,000 + GST, YP example 2020

33m x 18m x 6.5m, \$300,000 includes concrete. Has loading ramp, side door access, Nundroo, 2020

Cockaleeche Engineering

Cockaleeche Engineering
26m x 42m [with 2 x 12m lean-to either side], Nundroo.
Circa 2018, \$130,000 [not including concrete, pad, tank]

Stringer Engineering – Warrambo
55t closed top PTO, Hyd wheels [4] & hitch \$24,000
55t open top PTO, Hyd wheels [4] & hitch \$20,500

Sharman – Long Plains
70t inc fumigation/aeration
\$13,200 [+ freight & concrete]

Sharman – Long Plains
35t Portabin \$8,700 + freight.
Pricing includes GST

Welke silo DIY, approx. \$9,000 for kit ex WA, plus \$3,000 on farm labour \$12,000 to complete. Can fit 11 DIY kits on a semi-trailer.

Leske Engineering – Shea Oak Log
82t silo, sealed, \$14,500 + gst [plus concrete and freight]

Leske Engineering – Shea Oak Log
55t portable, 15" Auger, hyd lift and valve, \$27,200 + gst

Supplier information and contact list

The approximate pricing shown is to be used as a guide and for advertising purposes only, please contact the supplier for firm accurate pricing as prices will differ with design options, freight, GST and number of items ordered. Most manufacturers will offer early-bird discounts to ensure supply/installation guarantees before harvest.

Be sure to read through the tax incentive document from Bentley's Accounting, contact them or your accountant to take full advantage of the current Federal Govt tax write off incentive schemes.

Ben White, GRDC/Kondinin Group:
1800 933 845. On farm storage specialist,
independent consultant, great knowledge
and experience with OFS design, products,
and quality control. www.storedgrain.com.au

It's important that any permanent storage silos are built to AS:2628 and successfully pass a pressure test on farm (after delivery). Grain quality is paramount for longer term storage. Fumigation and aeration ability give the best results in readiness for a timely and hassle free out-turn of product.

We hope you found the storage guide helpful and can use this in conjunction with the Bentley's Grain Growers Guide on tax incentives for 2020.

HARVEST FREIGHT

- How can I get cheaper freight rates to increase farm gate profits?
- How will my truck keep up to the header in an average harvest?
- How will my carrier keep up to daily tonnes reapt and cart longer?
- How can I deliver grain direct from paddock to port and maximise harvest efficiencies?
- How can I ensure I capture ultimate freight savings and maximise my investment opportunity by delivering the most grain possible to a port I have shares in?

T-Ports and EPFG have the answers and ability to support you this harvest.
